Grass and plants need less water during the cooler months.

Plus, watering less cuts down on nutrients that harm our waterways.

You can water less and still love your lawn!
When watering every other week this winter (if your lawn needs it), remember your designated watering day.

**Residential watering schedule**

<table>
<thead>
<tr>
<th>When</th>
<th>Odd numbered or no address</th>
<th>Even numbered addresses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eastern Standard Time</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Winter (First Sunday in November)</td>
<td>Saturday</td>
<td>Sunday</td>
</tr>
</tbody>
</table>

Water your yard:
- Only when needed
- Before 10 a.m. or after 4 p.m.
- For no more than one hour per zone
